Ayush Sahu

Mumbai, Maharashtra
7756861750 ayushsahu1430@gmail.com ayush-sahu1430 Ayush (Portfolio) Ayush2649

Summary

A **Software Engineer** adept at integrating **AI/ML** and **NLP** for efficient **automation** (driving 40% search efficiency and 30% information retrieval), with a strong foundation in building **scalable applications** using the **MERN stack** (achieving 30% efficiency and 25% latency reduction).

Experience

Contentstack **Aug 2026 – Sept 2026**
Associate Software Engineer *Mumbai, Maharashtra*

- Working on large-scale CMS migration projects, improving migration efficiency by **40%** through automation and reusable migration tooling.
- Developing scalable internal tools and platform enhancements to streamline content management workflows and improve engineering productivity.

Contentstack **Jan 2026 – July 2026**
Associate Software Engineering Intern *Mumbai, Maharashtra*

- Developed internal applications, including the **Solution Library**, improving solution discovery and engineering productivity by **30%+**.
- Contributed to CMS migration initiatives by automating migration workflows and successfully migrating **1000+ content entries** with high data integrity.

Aspiring Media Tech **June 2024 – Dec 2024**
Web Developer Intern *Vasai, Maharashtra*

- Built and optimized a full-stack campaign tracking platform with AI-powered metadata enrichment, improving search efficiency by **40%** and overall system performance by **30%**.

Projects

SATAT | *Next.js, TypeScript, Firebase, Firestore, AI/LLMs* | GitHub | Live Demo **Sept 2026**

- Built an AI-powered self-improvement platform integrating **3 core modules**—task management, workout tracking, and nutrition tracking—with Firebase authentication and user-scoped Firestore security for unified daily planning and progress tracking.
- Developed **Orbit**, an AI assistant featuring **7-day contextual memory** and cross-platform search, alongside AI-powered meal logging supporting **3 input modes**—photo, text, and voice—to estimate nutritional macros and automatically record food intake.

VisuTale | *Next.js, TypeScript, React, Gemini API, ElevenLabs, Remotion, MongoDB* | GitHub **Dec 2024**

- Built an AI-powered educational video generation system integrating an **8-component pipeline** spanning storyboard planning, validation, approval, speech synthesis, timeline compilation, rendering, media validation, and artifact storage; generated validated **1080 × 1920** MP4 videos at **30 FPS** using Remotion.
- Engineered an AI content pipeline integrating **Gemini** for storyboard generation and **ElevenLabs** for narration and character-level speech alignment, synchronizing scene timing and captions to produce a 6-scene explainer with **42 timed caption cues**, rendered as a playable video.

Education

University of Mumbai **July 2022 – June 2026**
Bachelor of Engineering in Computer Science *CGPA - 8.55 / 10*

Technical Skills

Languages: Java, JavaScript, Python, C/C++, SQL (Postgre-SQL, MySQL), HTML, XML, CSS
Technologies & Frameworks: AIML, NLP, DL, React, Node.js, Flask, Express.js, Bootstrap
API Tools: Git, Github, RESTful APIs, Postman
Cloud and Databases: AWS, Firebase, MongoDB, SQL Server
Others: DSA, OS, CN, DBMS, OOP, SDLC, Deep Learning, Agile (Scrum/Kanban), Debugging, Technical documentation, Code Reviews, Automation

Extracurricular

- Solved 500+ questions on LeetCode and 550+ on GFG, demonstrating strong problem-solving skills.
- Served as a core member of NSS (National Service Scheme), VCET, contributing to multiple social impact initiatives.
